

The Accelerated Learning Philosophy

Executive Vice-President Adrian G. Cottin, PCO's International, Inc. Venezuela and USA.

Abstract:

The "Accelerated Learning Philosophy" Learning Experience will increase the effectiveness of training personnel to facilitate adult learning processes. They will learn to apply techniques derived from the Accelerated Learning holistic philosophy, and assume current approaches that promote their Learning Partners possibilities, interests and motivations.

This Learning Experience includes both theoretical and practical components. It is based on the principle that learning is more intensively acquired when we do and reflect at the same time. The experience emphasizes the theoretical and practical aspects of the Accelerated Learning philosophy, although principles and assumptions from various fields are addressed, the main focus is that the Learning Partner applies the acquired knowledge in real and concrete training situations.

We leverage the trainer's experience in Adult Learning Processes in various countries from America, Asia, Europe and Oceania.

Speaker:

Adrian G. Cottin, International Training Fellow, graduated from the Program on Design, Management and Marketing of International Training from the Junior Chamber International University, USA. Trainer of Trainers in Accelerated Learning Methodology, Ontological Coach, NLP Master Practitioner and ASTD's HPI and Training Certificate Program.

Guest speaker at seminars and congresses in dozens of countries. During the last decade, Adrian has conducted programs for more than 1.000.000 persons around the world, and more than 18.000 hours of Train the Trainers in Accelerated Training Techniques.
